

## Problems with Supply-Chain Management

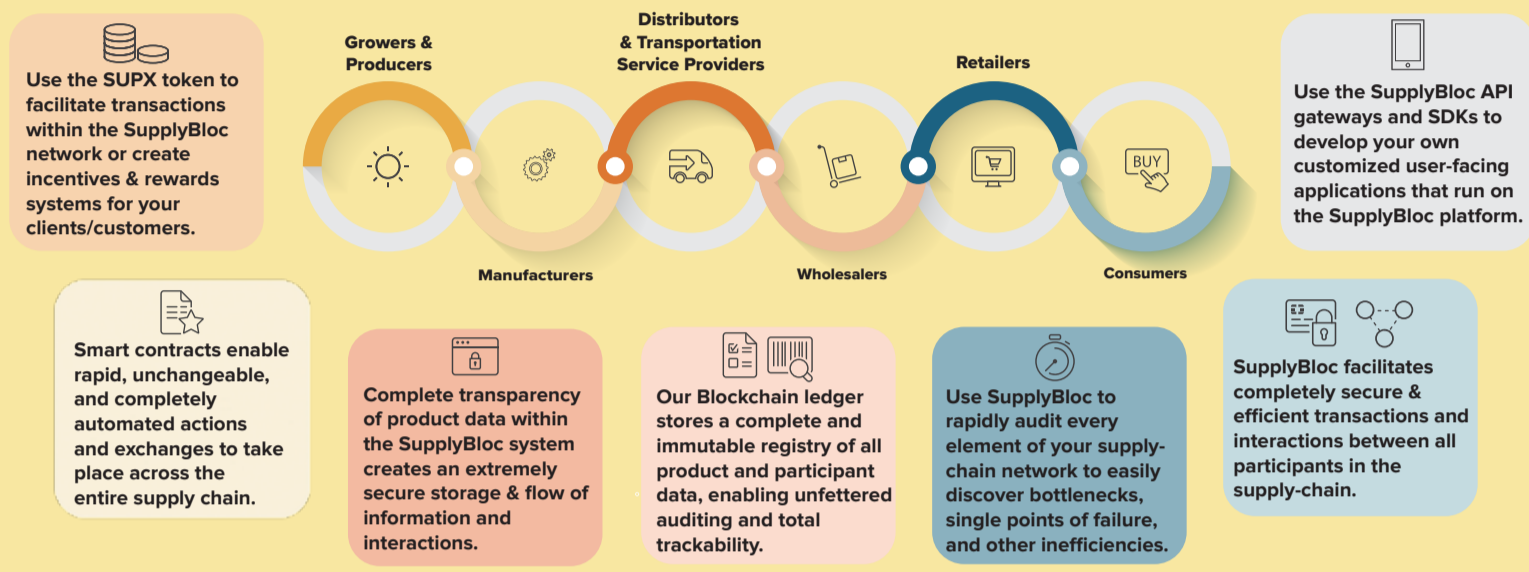

Currently, supply-chains face problems associated with a lack of trackability, transparency, and logistical unification. This leads to more opportunities for corruption, single points of failure, disparity between participants, and other inefficiencies during transactions, information flow, and interactions or exchanges between products and supply-chain members. Small to mid-sized businesses are struggling to adapt and expand into globalized marketplaces as they attempt to confront these logistical issues along their own growing supply-chain networks.

## Our Industry-Transforming Solutions

SupplyBloc Technology is solving these issues by bringing unprecedented trackability, transparency, and logistical unification to supply-chain management with the use of blockchain technology, smart contracts, and an all-encompassing platform for communications, transactions, and exchanges between participants and products within a supply-chain network. We're creating a completely optimized and highly efficient flow of products and information from point A-to-B. We're helping businesses grow by streamlining the process of information and material exchange via blockchain integrated transactions and interactions along supply-chains.

## Technology & Platform

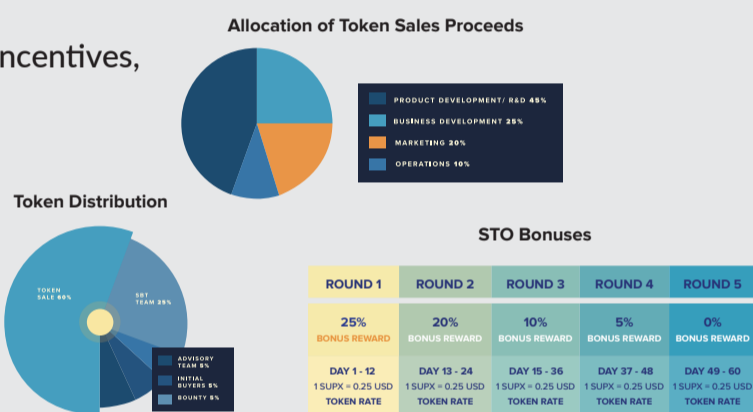

SupplyBloc Technology uses blockchain, smart contracts, and an application development platform to revolutionize supply-chain infrastructure and management. This is primarily done by delivering unprecedented levels of transparency, trackability, and unification to all Growers, Producers, Manufacturers, Distributors, Transportation Service Providers, Wholesalers, Retailers, and Consumers or End-Users within a supply-chain network.

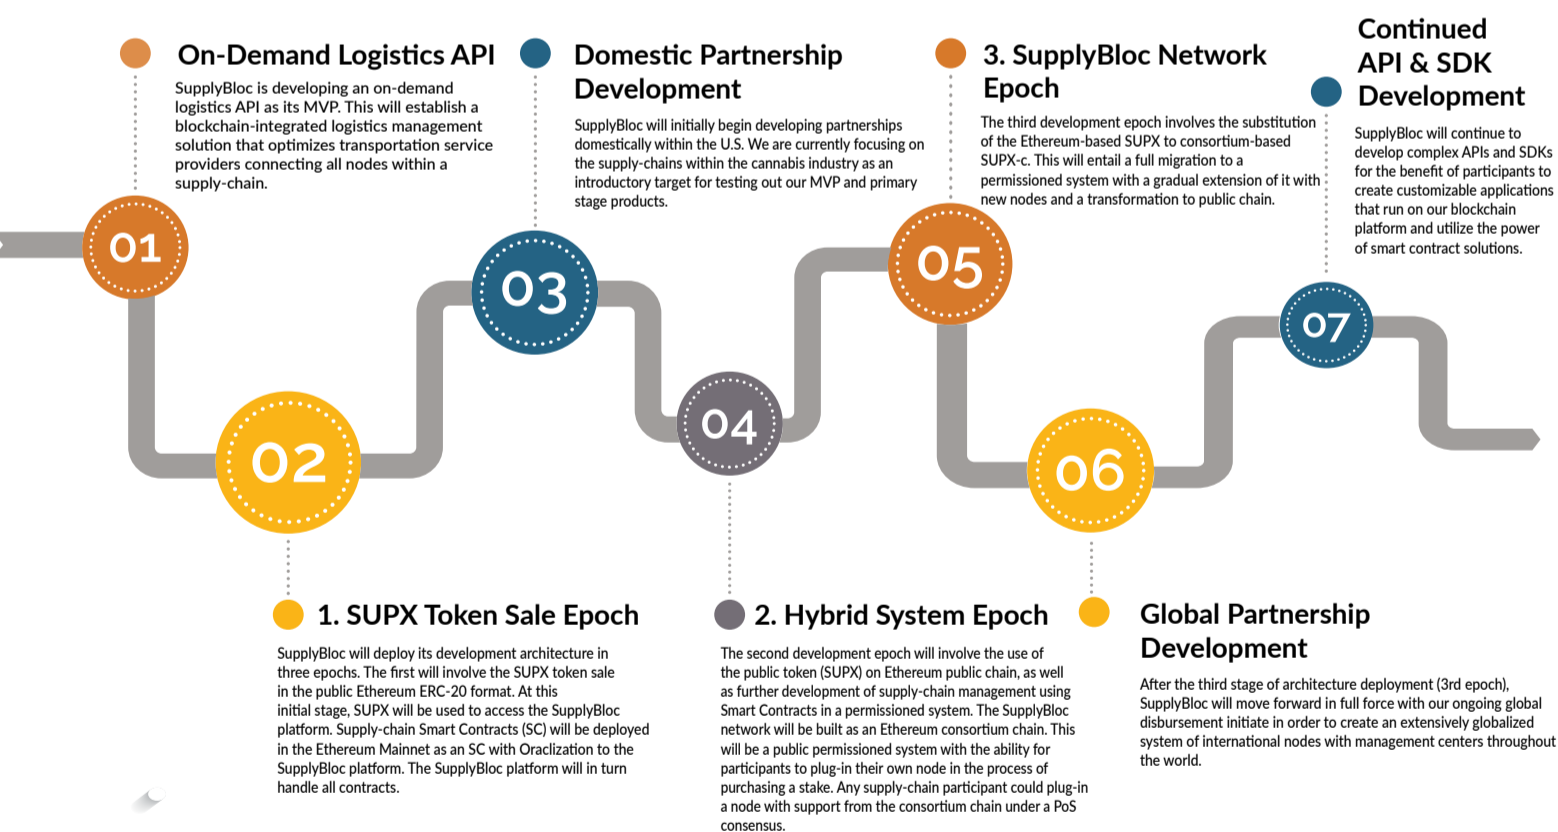

## Token Offering/Sale Info

SUPX Token – An Integral Facilitator of Transactions, Incentives, & Rewards within the SupplyBloc Platform

- Start Date for Token Offering: September 1st, 2018 at 12:00am PST
- Soft Cap = 1,000,000 USD
- Hard Cap = 40,000,000 USD
- Exchange Rate for SUPX Tokens = 0.25 USD = 1 SUPX Token
- Receive 1 Share of Common STO Stock and 4 SUPX Tokens for \$1.00 USD
- Methods of Payment Accepted: BTC, ETH, LTC
- Total Available Token Supply (Max Limit): 750,000,000

## Product Development Roadmap

## On-Demand Logistics API

SupplyBloc is a platform that provides a blockchain engine for customizable application developments that can be easily integrated into supply-chain management operations. Our Platform as a Service (PaaS) model can help small to mid-sized businesses (SMBs) take advantage of the power of blockchain technology without having to completely overhaul their existing systems. The initial infrastructure of our service relies on an On-Demand Logistics API that specifically optimizes transportation services within a supply-chain. This is meant to foster efficient connectivity between nodes by establishing ironclad webs of distribution and delivery.

## SupplyBloc Team

ROBERT MCNULTY  
CO-FOUNDER & CEO

RUDY BRATHWAITE  
CO-FOUNDER & CIO

JEFFREY AARONSON  
CFO

EVERETT CONRAD  
DIRECTOR OF  
SOFTWARE  
DEVELOPMENT

ANDREW ZUBKO  
BLOCKCHAIN &  
SMART  
CONTRACT DEVELOPER

IHOR PIDRUCHNY
